SUMMARY

Full-stack developer with experience in React, Next.js, Node.js, and MongoDB. Skilled in building RESTful APIs, implementing authentication and authorization, database design, and scalable web applications.

EDUCATION

Galgotias College Of Engineering and Technology

2022-2026

B.Tech - Computer Science and Engineering - CGPA - 7.9

Greater Noida

EXPERIENCE

Intern at Vocman [↗](#)

Oct 2025 – Dec 2025

Role - Full Stack Software Developer Intern

Vikas Puri, New Delhi

- Designed and implemented core software features leveraging advanced Data Structures and Algorithms, including Graphs, Segment Trees, and Dynamic Programming.
- Delivered multiple feature modules across projects within defined timelines, ensuring code quality and functional correctness.
- Implemented secure user authentication, search functionality, and a voting-based ranking system to enhance application usability and security.
- Developed and optimized backend database operations and built responsive frontend components using React and CSS, improving performance and cross-device compatibility.
- Collaborated with cross-functional team members using standard software development practices, version control, and code reviews.

GLB Hackathon 3.0

2023

Role - Frontend Developer

Greater Noida

- Selected as a finalist among **Top 25 teams out of 250+ participants**.
- Designed and implemented a problem-solving application under strict time constraints.
- Applied frontend development, APIs, and data handling to deliver a functional solution.
- Demonstrated strong teamwork, rapid prototyping, and problem-solving skills.

PROJECTS

Foodie-Feed [↗](#) | [React](#), [Node.js](#), [Express](#), [MongoDB](#), [JavaScript](#), [HTML](#), [CSS](#)

Jan 2025 - Apr 2025

- Developed a full-stack food-based social platform allowing users to explore and interact with food content.
- Built responsive user interfaces using React and CSS, improving page load performance and usability.
- Implemented RESTful APIs using Node.js and Express for handling user data and content management.
- Integrated MongoDB for efficient data storage and retrieval with scalable architecture.

AI Finance Platform [↗](#) | [Next.js](#), [Tailwind CSS](#), [Prisma](#), [Supabase](#), [AI APIs](#)

Oct 2025- Dec 2025

- Built an AI-powered financial management platform to track income, expenses, and multiple accounts.
- Implemented AI-based receipt scanning and automatic transaction categorization using LLM APIs.
- Designed interactive dashboards using Next.js, Tailwind CSS, and Shadcn UI.
- Integrated secure authentication using Clerk and managed data with Prisma and Supabase.
- Automated recurring transactions, alerts, and reports using Inngest background workflows.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL

Technologies/Frameworks: HTML, CSS, JavaScript, React, Next.js, Node.js, Express, MongoDB, Bootstrap

Developer Tools: Inngest, Clerk Dashboard, Supabase Console, Prisma Studio, MongoDB Compass, IntelliJ IDEA

Concepts: REST APIs, Authentication, Authorization, CRUD Operations, MVC Architecture

EXTRACURRICULAR

- Taught basic Java/DSA in offline mode.
- Member - Extreme Technical Group (2023 - Present)
